

SAFETY DATA SHEET

Section 1: Identification

Product Name: Firewood

Chemical Name/Synonyms: Wood, Timber, Logs

Company: Fiddlesticks LLC
2631 F.L. Shuttlesworth Drive
Birmingham, Alabama 35234
PH2055473353

In emergency call 911.

Recommended Use: To provide heat for comfort, cooking and pleasure.

This version issued: 1JAN20 and is valid for 10 years from this date.

Section 2: Hazard(s) Identification

Hazard Classification: not assigned

Signal Word(s): Not Hazardous

Hazard Statements: not assigned

Pictograms: not assigned

Precautionary Statements: In its natural form this product is not classified as hazardous. Handling the product without gloves may give rise to splinters.

Section 3: Composition/ Information on Ingredients

Substance: Wood 100% Hardwood Species

CAS No.: Not Assigned

Additives: Produced from cutting and splitting logs and species of various hardwood species. Nothing is added to product during processing.

Chemical Identity: Natural wood is comprised of cellulose, hemicellulose and lignin, with traces of other substances, all of which are non-hazardous in themselves and in the concentrations present in split wood.

Section 4: First-Aid Measures

After skin contact: Wipe off or wash skin. Remove splinters and disinfect injured skin. Some species cause allergic reactions in some people. If persistent irritation occurs seek medical attention.

After eye contact: Exposure is considered unlikely unless dust is generated. Quickly and gently brush particles from eyes. Immediately flush the contaminated eye(s) with water until contaminants are removed. Seek medical attention if irritation persists.

After inhalation: Inhalation is considered unlikely unless dust is generated. First aid is not generally required. If in doubt seek medical attention.

After swallowing: Due to product form and application ingestion is considered unlikely. If irritation occurs seek medical attention.

Section 5: Fire-Fighting Measures

There is little risk of an explosion from this product if involved in a fire. The ignition temperature for wood is in excess of 400° Fahrenheit.

Suitable extinguishing agents: Water, CO₂, Sand, Dry Chemical, Foam, Water Fog.

Special protective equipment for firefighters: SCBA

Section 6: Accidental Release Measures
Personal precautions: Work gloves should be worn if skin irritation occurs and to minimize risk of splinters. Measures for environmental protection: Collect and reuse where possible. Measures for cleaning/collecting: Pick up, sweep and vacuum.
Section 7: Handling and Storage
Handling: No special transport requirements are necessary Storage: Store in a dry well ventilated area
Section 8: Exposure Controls/Personal Protection
General protective and hygienic measures: No special equipment is needed when handling product. Breathing equipment: No special ventilation requirements are normally necessary for this product. Protection of hands: Work gloves minimize the risk of splinters Eye protection: Eye protection is not normally necessary when using this product, however, if in doubt wear suitable protective glasses or goggles.
Section 9: Physical and Chemical Properties
Form: split solid wood Odor: Wood Odor threshold: No data. pH: No data. Melting point/melting range: Not applicable Boiling point/boiling range: Not applicable Flash point: not applicable Evaporation rate: not applicable Flammability: not applicable Upper/lower flammability or explosive limits: not applicable Auto ignition temperature: 400°-500° Fahrenheit Danger of explosion: No Vapor pressure: nil at ambient temperatures Vapor density: not applicable Relative density: .25-.75 Solubility in/Miscibility with water: insoluble
Section 10: Stability and Reactivity
Reactivity: This product is unlikely to react or decompose under normal storage conditions. Chemical stability: Stable under normal conditions. Conditions to avoid: Open flames Incompatible materials: Compatible with most commonly used materials.
Section 11: Toxicological Information
Acute toxicity: This product is expected to be of low to no toxicity. Based on available data, criteria are not met. Potential routes of exposure/potential health effects There is no data at hand indicating any target organs
Section 12: Ecological Information (non-mandatory)
100% biodegradable. It will not accumulate in the soil or water or cause long term problems. Not an environmental hazard.
Section 13: Disposal Considerations (non-mandatory)
Reuse, Compost, Incinerate, Landfill

Section 14: Transport Information (non-mandatory)

Mode: (air, land, water) Not regulated as a hazardous material by the U.S. Department of Transportation. Not listed as a hazardous material in Canadian Transportation of Dangerous Goods (TDG) regulations. Not regulated as a hazardous material by IMDG or IATA regulations concerning the transport of hazardous materials.

DOT regulations:

- **Hazard class:** not applicable
- **Land transport ADR/RID (cross-border):** not applicable
- **ADR/RID class:** not applicable
- **Maritime transport IMDG:** not applicable

Air transport ICAO-TI and IATA-DGR:

- **ICAO/IATA Class:** not applicable

Section 15: Regulatory Information (non-mandatory)

US Federal Regulations

Clean Air Act, Section 112 Hazardous Air Pollutants (HAPs): not applicable

TSCA (Toxic Substances Control Act): not applicable

OSHA: Wood products are not hazardous under the criteria of the federal OSHA Hazard Communication Standard 29 CFR 1910.1200.

Section 16: Other Information

SDS date of preparation/update: 1JAN20
